

SUPPORTING YOUR COVID-19 CLINICAL TRIALS PROGRAM

PARTNER WITH OUR GLOBAL CENTRAL LABORATORY TO GET A JUMP START ON YOUR COVID-19 STUDY

As organizations and individuals around the world continue to adapt to the coronavirus pandemic, we at ACM Global Laboratories are committed to helping our research partners work to quickly investigate vaccine and therapeutic solutions.

That's why, in addition to providing access to the right blend of scientific experts, project managers and other professionals ready to guide your program from inception to completion, **we're offering special discounts for COVID-19 related studies and an accelerated review process.**

Our Testing Portfolio for COVID-19 Studies

Our global central lab offers a full range of state-of-the-art instruments and testing platforms to facilitate viral detection and perform assays designed to support clinical trials to evaluate the safety and efficacy of vaccines and therapeutic interventions to treat COVID-19. ACM's team of knowledgeable scientists are available to conduct immunophenotypic analysis and support the routine safety and bioanalytical studies needed to successfully complete your COVID-19 clinical trial.

We're offering special discounts for COVID-19 related studies and an accelerated review process.

Comprehensive Laboratory Support

With a worldwide network of wholly-owned facilities and strategic laboratory partners, we support clinical trials in more than 65 countries, including, North and South America, China, India, Asia-Pacific, China and across all of Europe. We are a recognized leader in global clinical trials testing.

As a full-service central laboratory, we proudly offer these services that are managed by our teams of dedicated professionals:

Customized sample collection kits

Dedicated project management

Expert study set up

Global logistics solutions

Specimen management expertise

Specimen storage options

With a focus on quality and the ability to provide the skills and bandwidth needed to deliver robust central laboratory services, our experts offer effective strategies and solutions to efficiently execute your global clinical trial.

Please contact us to learn more about how we can facilitate your COVID-19 clinical trial program at acmgloballab.com/COVID19.

Our laboratory can safely handle and test COVID-19 samples and offers the following testing services:

SARS CoV-2 PCR tests

Serological antibody tests

Vaccine assessment

Immunophenotyping services

Routine safety testing

Bioanalysis support for PK studies
